

« serving innovation »

« Our science for your applications »

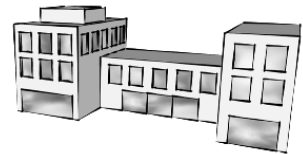

You are

- ✓ a company or an industrial consortium
- ✓ a competitiveness cluster
- ✓ a professional association
- ✓ a technical centre

You wish to

- ✓ improve your understanding of a process or a system
- ✓ validate or develop a new prototype or product
- ✓ identify or develop a technical solution to a technical problem

R&D internships Programme

1. Contact us

to give us details about your request

Contact:
mathieu.tilquin@tec21.fr
04 76 82 52 46

2. Meet our experts

and build with them a work plan suitable for a 3 to 6 months internship to be carried out by a master or engineering student

3. Monitor the study

that will take place on one of our experimental platforms under the supervision of our specialists

You get

- ✓ results obtained in a high-tech environment and analysed by the best specialists in the subject
- ✓ a connection with researchers in engineering sciences
- ✓ the groundwork for future collaborations based on mutual trust to develop your R&D projects

Tec 21 is the Laboratoire d'Excellence for mechanical and process engineering of the Université Grenoble Alpes

- 7 research laboratories
- 250 researchers, engineers and technicians
- 40% of the global activity in relation to industry
